USB Driver Installation Instructions for Stratus II

Windows XP

1) Download the CRIUSB.INF file from the Stratus II homepage: www.controlresources.com/variable-frequency-drive-smartfan-stratus-ii/

2) Connect a USB cable from the Stratus II to the Computer and apply power.

3) The "Found New Hardware Wizard" will open

4) If shown, select "No, not this time", then click Next

5) Select "Install from a list or specific location", then click Next

6) Select "Search for the best driver in these locations"

7) Select "Include this location in the search:", then click Browse

8) Locate the folder where the CRIUSB.INF file was downloaded to and click "Next".

9) If a security warning window appears, click "Continue Anyway" then click "Finish"

10) Determine the Com Port Number at Device Manager/Ports/Stratus II Communications

Windows 7

1) Download the CRIUSB.INF file from the Stratus II homepage: www.controlresources.com/variable-frequency-drive-smartfan-stratus-ii/

2) Connect a USB cable from the Stratus II to the Computer and apply power.

3) Windows will fail to install the driver on its own.

4) Open the Device Manager in Control Panel and double click on "Stratus II Communications" under "Other Devices"

5) Click Update Driver and select "Browse my computer for driver software".

6) Click Browse and locate the folder where the CRIUSB.INF file was downloaded to.

7) Click OK and Next. If you get a security warning, Click "Install this driver software".

8) That is it. Windows has successfully updated your software driver. You will see "STRATUS II COMMUNICATIONS (COM#)" under the Ports branch in Device Manager. Make note of which COM port was assigned to the Stratus II.
